

Mines and Mining Stocks

OUTPUT OF STAR MILL WILL BE HEAVY

NEW PRODUCES HIGH GILSONITE

LEADERS SHOW SOME STRENGTH

New Mill at Cherry Creek Will Assist Mining in the District.

Although Cherry Creek has been silent as to the mining activities in that district, there has been much work done in the past few months. D. H. Allison, who was recently in the district looking over the mining conditions, has the following to say in the Ely Record:

The renewed activity in and around Cherry Creek demands that the outside world get a glimpse of the light we are hiding under a bushel.

The new Star mill is nearly completed, and when finished, will be one of the finest, latest improved ones in the state. All of the latest improved machinery and appliances are used in its equipment and the immensely valuable ore body that has been demonstrated to exist in the old historic Star, together with the valuable amalgamation of the Nevada British, which is a wonder in itself, insures the Star of becoming one of Nevada's greatest producers in the immediate future. A force of seventy-five men is now busy preparing labor for several hundred millmen and miners.

A contract has been let to Thomas Curtis to continue a tunnel designed to tap the immense vein in the Mother Lode proposition in Silver Canyon.

W. S. Henderson and associates are here and have a force of men at work developing the old-time Black Metal. The deposit has been proven to be extensive and valuable, and the Black Metal company are miners, not speculators.

Examining Coal.

The Ely smelter now has an expert in the person of Mr. Vickers, who is making an examination of the coal deposit west of town. A two-foot vein of a fine coking coal has been uncovered with other parallel veins yet to be investigated. Mining men have been too slow about looking into this promising proposition. The strike of the deposit is southeasterly and northwesterly, and crops up in places several miles distant from the Blaine mine to Elko. The formation is composed of sandstone, shale and fossilized limestone, all of the necessary accompaniments of a coal measure.

The Bennett Brothers have some fine showings near Shoshone that are worth some mining man's while to investigate.

W. B. Lawlor, an old mining veteran, has some handsome property in the same vicinity on which he has a force of men employed.

W. J. Wallace and associates are examining the Hartford Nevada property, and expect to start work soon. This is one of the best gold-bearing properties in the country.

A prospective purchaser is examining the famous Egan properties. The Egan was one of the great producers of the halcyon days of Nevada. The low price of silver has been the damper.

The Biscuit people have been developing all summer and expect to commence shipping ore soon.

There is much valuable high-grade ore in Pine Nut canyon which an energetic company of English capitalists are trying to acquire. This is a secret, however.

Winby C. Clark is preparing to do some extensive work in Chance canyon, where the ore is very high-grade silver, lying between the Star and Biscuit properties.

BOSTON AND NEW YORK COPPER MARKET STOCKS

James A. Pollock & Co., bankers and brokers, 6 West Second South Street, furnish the following, received over their private wire:

Boston Copper Range.

Sales Open High Low Close.
